

IC2 Database Workgroup Meeting Notes

September 14, 2022

Planning for training on HPCDS for IC2

Discussion to provide several trainings (length of time can be short to longer as needed) for different audiences regarding the HPCDS

First training audience: those that are considering or planning to require the use of HPCDS

- Draft learning objectives of first training - attendees get a better understanding of the capabilities of the HPCDs, they are given examples of how others put it into rulemaking or guidance (including cost analysis), hear common challenges and solutions for reporters and references of guidance

Second audience: a training for onboarding those that are responsible for managing reporting

- Draft outline: intent of HPCDS, what is required to be in a report, what is optional data to be added, example language for rulemaking and guidance, time/cost required for reporters, common challenges for reporters and solutions (for the optional data- it could include what is current and then what additional items are planned to be added and when)

Third audience: consumers of data
