**Problem the Chemicals of Concern States' List:** <https://www.theic2.org/programs/chemicals-in-commerce/chemicals-of-concern/>

- The page was put together back when there were few state laws so the framework would need to evolve. Consideration or reframing of the page as links are out of date by many years.

#### **Discussion of Proposed Solutions**

- Make the page more dynamic than just a list.
- States can write blurbs with links to their main pages of reporting requirements and regulations. Or links to restrictions and reporting of chemicals of concern. Or link to CHAD
- Chemicals of concern tend to benchmark one. The language for blurbs for example could be describing chemicals that are known carcinogens and describe their hazard traits.
- Could be a restrictive list based on hazards, so it wouldn't have to be updated regularly unless the state decides.
- We can have a blurb on what is a COC

#### **Action Items**

Saskia:

Work with Mikalah on the overall draft and draft a WA blurb.

Mikalah:

Update the COC page first blurb. It will be a summary sentence on the COC page:  
<https://www.theic2.org/programs/chemicals-in-commerce/>

Nancy, Al and Peder:

Work together to draft a MN blurb
