

High Priority Chemicals Data System (HPCDS)

User Guide to Searching HPCDS Data

May 27, 2025

- *Who is this User Guide intended for?*
 - This User Guide is intended for consumers of data to search data reported by manufacturers of children's products under [Washington State's Children's Safe Products Act](#), [Oregon's Toxic Free Kids Act](#), and Vermont's 2014 Act 188 (Vermont Statute Title 18 38A Vermont Chemicals of High Concern to Children), and priority chemicals in general consumer products required by Safer Products for Washington (SPWA). Consumers of data include: potential purchasers or owners of children's and other consumer products; researchers; non-governmental organizations (NGOs); and government agencies.

- *Do I need to register for an HPCDS account to search the data?*
 - No, you only need to register with HPCDS if you are a reporting manufacturer.

- *Where can I find other HPCDS resources, including a glossary of terms used in the HPCDS?*
 - See page 7 of this User Guide.

- *The HPCDS is optimized for Chrome and may not work with other browsers.*

- *Your use of the HPCDS constitutes acceptance of the [Terms of Service](#).*

Search Product Category Data

1. Click **Reports** from the top navigation and then **Search Product Category Data** from the menu or use this direct link: <https://hpcds.theic2.org/Search>. Here you can view all published reports on the presence of chemicals of concern in children's products required by the Oregon Toxic Free Kids Act (TFKA), the Washington Children's Safe Products Act (CSPA), Vermont Statute Title 18 38A Vermont Chemicals of High Concern to Children, and priority chemicals in consumer products required by Safer Products for Washington (SPWA). To view additional Vermont Brand Name and Product Model information see page [7].

The information presented here is reported to the states by manufacturers of children's products through the IC2. The presence of a chemical in a children's product does not necessarily mean that the product is harmful to human health or that there is any violation of existing safety standards or laws. The reporting triggers are not health-based values.

2. Select one or more states using the checkboxes. Next, choose the type of data to narrow the search. Select *All* to search by all data, *Chemical(s)/Class*, *Company*, or *Product(s)* using the radio buttons.

The information presented here is reported to the states by manufacturers of children's products through the IC2. The presence of a chemical in a children's product does not necessarily mean that the product is harmful to human health or that there is any violation of existing safety standards or laws. The reporting triggers are not health-based values.

3. Search by chemical name or CASRN (Chemical Abstracts Service Registry Number) for OR, WA (CSPA) or VT by typing in the text box and/or using the drop-down list. You can also search by chemical function using the drop-down list. You may search for more than one chemical at a time. For WA (SPWA), search by chemical class. To view all available SPWA reporting classes, type "class" into the Chemical(s) box before selecting. You may search for more than one chemical class at a time.

The information presented here is reported to the states by manufacturers of children's products through the IC2. The presence of a chemical in a children's product does not necessarily mean that the product is harmful to human health or that there is any violation of existing safety standards or laws. The reporting triggers are not health-based values.

IMPORTANT: No results will appear for WA (SPWA) if a specific chemical or CASRN are searched. The chemical name and CASRN will appear with the chemical class search results.

Recommendation: Search WA (SPWA) reports separately when selecting *Chemical/Class*. WA (SPWA) data originates at the class level.

4. Search by company name by typing in the text box. As you type, companies in the system that match your search will appear in a drop-down list. Select the company or companies from that list. You may search for more than one company at a time.

children's reporting

- For products, search by brick name or brick code by typing in the text box and/or by using the drop-down list. “Brick” refers to a product category and means the “brick” level of the GS1 Global Product Classification (GPC) standard, which identifies products that serve a common purpose, are of a similar form and material, and share the same set of attributes. You may search for more than one product at a time. For more information, see <https://www.gs1.org/standards/gpc/how-gpc-works> and <https://www.gs1.org/services/gpc-browser>.
